TIMING The vaccination schedule is partly determined by the infection pressure in your coop. Neornivet will be happy to guide you through this.

SUPPORT Support your chicks with **Immuno-Plus** or **Immuno Booster NEW** from our product range **NeorniPharma** for good growth and immunity building.

* **VACCINATION EVES** Every Tuesday evening at 6.30pm (all year), Neornivet vaccinates day-old chicks against Marek, Gumboro (IBD) and Newcastle Disease (NCD). The cost is €0.75/chick and no consultation is charged.

Call us at **+32 11 96 91 02** to make an appointment.

Address: Beverlosesteenweg 129, 3583 Paal, Belgium.

Growing chickens (from 7 weeks) & full-grown chickens

| | |
|---------------------|--|
| From 7 weeks of age | Infectious bronchitis (drinking water) |
| May-June | Smallpox + Infectious laryngotracheitis (ILT) |
| May-June | NCD (injection/drinking water) |
| August-September | NCD (oil injection)** |
| August-September | Infectious bronchitis (drinking water) |

SUPPORT Support your growing and full-grown chicks with **Immuno-Plus** or **Immuno Booster NEW** from our product range **NeorniPharma** for immunity building.

** **EXHIBITIONS & SALE** Vaccination against Newcastle Disease is mandatory for exhibitions and when selling chickens.
